

PHARMACY MANAGEMENT SYSTEM

MULTIPLE PHARMACY SITE SOFTWARE

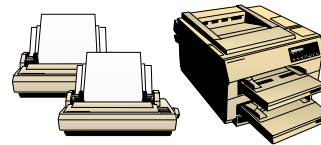

Each pharmacy site may contain the following hardware configuration

Multiple Terminals

Each terminal communicates via the TCP/IP Ethernet network, serial communication or both.

Each terminal may be a member of a local network or a wide area network under Windows95.

Multiple Printers

Each printer may be one of the following: local terminal, system, or network and then either dot matrix or laser.

Modem Communications

The host central computer system handles all communications either via dial up modem, X.25, Frame Relay or TCP/IP communications for system wide communications and third party adjudication.
